2010 Metalcon Las Vegas October 20-22

We have decided to take a different approach to this year's Metalcon Show. We have always had a booth and enjoyed the show but many times we were not able to showcase our software and spend adequate time with those really interested in our capabilities. This year we will host a series of 1 /1/2 hour personal demonstrations beginning at 8:30 a.m. We invite you to give us a call and schedule your time session. These sessions will be limited so make your plans now. We will also have a general session form 6:30 p.m. until 9:00 p.m. on Wednesday and Thursday nights. We will be in the Las Vegas Hilton Convention Hotel Conference Room 14. **Call Now.**
